TECHNICAL DATA SHEET

Deck Wash Eco. Mild, biodegradable safe-to-use deck cleaner, specially intended for maintaining ships. With added pure soda.

Product description

Deck Wash Eco is a concentrated, water soluble heavy duty cleaner for fast and effective cleaning of water resistant surfaces, like decks and walls on ships. It is based on completely biodegradable surface active ingredients, tensides and detergents.

It also contains a biodegradable component that contributes to more intensive cleaning.

With Deck Wash Eco, Eco-Point International supplies an effective and user-friendly cleaner, where the ecological character of Deck Wash Eco results in a minimum environmental and safety load.

Solution areas

- Dirt and contamination on decks, walls and pipes causes unhygienic and unsafe conditions.
- Dirt and contamination on ceilings and high areas is difficult to remove.
- Deck Wash Eco is less irritant to eyes and skin compared to conventional cleaners.
- Dirt and contamination can cause damages and slippery situations.
- Deck Wash Eco can be used in pre-treatment of paintable surfaces.

Sustainable solution

Deck Wash Eco is a powerful, concentrated safe product, which offers a solution for the activities mentioned above. Deck Wash Eco achieves the ideal match between economic and sustainable quality requirements. Ideal for cleaning floors, walls and water-resistant surfaces of for example ships, yachts, boats, tankers, cargo ships, etc..

Special advantages

- Fully biodegradable.
- Can be diluted with water.
- Is a concentrate and therefore economic in use.
- Has rust-resistant properties.
- Foams a little and does not impair oil separation (of bilge/lens water).

Areas of application

- Cleaning of decks
- Cleaning of cargo holds such as pet coke, coal and mineral oil residues.
- Cleaning walls, pipes contaminated with mineral oils and greases
- Removing atmospheric contamination from ceilings.

Remarks

Deck Wash Eco works perfectly with cold water. Deck Wash Eco can be diluted with seawater as well. Deck wash Eco can be used on most metal surfaces; for aluminium, zinc and galvanised materials testing before use is advised. Deck Wash Eco can make painted surfaces and shiny aluminium matt, in case of doubt first test the product at a location that is less visible.

Product instructions

Deck Wash Eco is used manually. First consult the work instruction for the correct amount of Deck Wash Eco to be added to degrease objects to be painted.

Decks:	1-20 %
Before painting:	5-10 %
General cleaning:	1-10 %
Cargo hold cleaning:	10-50 %

Deck Wash Eco can be used by brush or mop, by spray method, with high pressure water jet, with steam cleaner and also with scrub machine.

The effect of Deck Wash Eco can be improved by using a cloth, Scotch-Brite, brush, broom or high pressure.

The dosing depends on the degree of contamination, from 1:1 to 1:10. For slight contamination it is even possible to use 1:50. Increase concentration when diluting with seawater.

Rinsing with water or drying with a cloth prevents soap residues.

Packing material

Eco-Point International products are packed in polyethylene H.D. or metal drums. When repeat orders are being delivered, used drums which are empty and not polluted are collected free of charge for recycling or reconditioning purposes. When incinerated, polyethylene has no harmful effect on the environment.

Eco-Point sprayers are made of PE or PET: light weight, little raw material per bottle, low production energy consumption, virtually unbreakable and therefore long life, little waste during production and recycling, no harmful substances when incinerated, 100% recyclable. These sprayers have wide footing to improve stability and a handy graduation to simplify using.
