TECHNICAL DATA SHEET

Ecotense Plus Lavender. Extra powerful, biodegradable, industrial floor cleaner containing natural soda for scrub drying machines and manual use.

Product description

Ecotense Plus Lavender is a concentrated, water dilutable floor cleaner for scrub drying machines and manual use based on fully biodegradable surface active components, tensides and detergents. Besides, the product contains a fully biodegradable component which contributes to an in-depth cleaning of floors. Eco-Point International's Ecotense Plus Lavender is a very economic, low foaming and very effective floor cleaner. The ecologic character of Ecotense Plus Lavender results in minimal environmental damage.

Solution areas

- Heavy industrial pollution on floors causes unhygienic working conditions
- (Rubber) tyre marks are difficult to remove
- Polluted floors are breeding grounds for bacteria growth
- Polluted floors may cause danger of skidding
- Polluted floors make a very neglected impression
- Polluted floors may cause damage to materials or machines
- Keeping floors clean is normally very labour-intensive and therefore expensive

Sustainable solution

Ecotense Plus Lavender is a very powerful, concentrated floor cleaner, that deals with the problems mentioned above energetically. Ecotense has the ideal combination of economic, ecologic and quality demands. Ideal for heavy cleaning, but also suited for daily upkeep.

Special advantages

- Ecotense Plus Lavender is fully biodegradable
- Ecotense Plus Lavender is water dilutable
- Ecotense Plus Lavender is strongly concentrated and therefore economic in use
- Ecotense Plus Lavender has rust-preventing qualities
- Ecotense Plus Lavender contains natural soda
- Ecotense Plus Lavender is not corrosive and therefore safe to use
- Ecotense Plus Lavender is low foaming and has a non skid effect
- Ecotense Plus Lavender has a very pleasant, fresh lavender scent
- Ecotense Plus Lavender provides a wide range of dilutions

Areas of application

- cleaning floors with a scrub drying machine
- cleaning floors manually
- cleaning floors polluted with mineral oils and fats
- cleaning floors polluted with bestial and vegetable oils and fats
- removing tracks from floors
- removing atmospheric pollution from floors

Remarks

Ecotense Plus Lavender is to be diluted with cold water. Using warm water will cause the active components to evaporate partially which will result in decreasing the cleaning action of the product. Ecotense Plus Lavender may frost painted surfaces and shining aluminium. In doubt, test at a less visible place first.

Product instructions

Ecotense Plus Lavender is used in a scrub drying machine. Follow the machine manual instructions to ensure the right dosage.

Ecotense Plus Lavender may be used manually as well (scrubbing, mopping etc.). Dosage depends on the pollution and varies from 1:10 up to 1:50.

Use Ecotense Plus Lavender to wet extreme pollution first. Let the product penetrate for a while before using a scrub drying machine.

Packing material

Eco-Point International products are packed in polyethylene H.D. or metal drums. When repeat orders are being delivered, used drums which are empty and not polluted are collected free of charge for recycling or reconditioning purposes. When incinerated, polyethylene has no harmful effect on the environment.

Eco-Point sprayers are made of PE or PET: light weight, little raw material per bottle, low production energy consumption, virtually unbreakable and therefore long life, little waste during production and recycling, no harmful substances when incinerated, 100% recyclable.
