TECHNICAL DATA SHEET

Ecotron. Moisture expelling product and preservative for electronic equipment and metals.

Product description

Ecotron has been specially developed to moisture-free electronic equipment and to preserve, in order to prevent moisture from causing problems. Ecotron is user-friendly: it is composed of low aromatic solvents that do not have harmful effects on man or the environment.

Solution areas

- The combination of moisture and electricity leads to life-threatening situations.
- Moisture causes interruptions in the production process.
- These interruptions result in production downtime.
- Interruptions cause expensive maintenance and unnecessary costs.
- Moisture in electronic equipment causes corrosion and hence earlier replacement.

Sustainable solution

Ecotron has been specially developed to expel moisture and preserve electronic equipment so that moisture can no longer cause problems. Ecotron therefore increases the operational reliability of electronic equipment and also prevents oxidation.

Special advantages

- Ecotron is user-friendly
- Ecotron does not contain any harmful solvents at all, such as chlorinated hydrocarbons
- Ecotron is safe on many plastics and synthetic materials
- Ecotron has excellent moisture-expelling capacities
- Ecotron has a long-term preservation effect
- Ecotron has excellent penetrating qualities
- Ecotron has perfect lubricating and cleaning qualities

Eco-Point Group

E: info@eco-point.com W: www.eco-point.com

Areas of application

- relay boxes
- wiring systems
- power distribution frames
- lighting
- preserving of metals
- PCBs
- telecommunication systems
- rechargeable batteries
- sound equipment

Remarks

Do not spray into an open fire and keep away from ignition sources.

Product instructions

Ecotron is highly penetrative and can therefore be used at places that are very difficult to access. Ecotron can also be used to preserve metal surfaces against rusting.

- Ecotron can be used by spraying or by immersion.
- Immersion method: immerse the object to be preserved in Ecotron. Allow the product to work, remove the object from the immersion tray. Let the object drain and dry.
- Spraying: switch off the equipment. Spray Ecotron onto the electronic parts of the equipment and let it dry for a while.

Packing material

Eco-Point International products are packed in polyethylene H.D. or metal drums. When repeat orders are being delivered, used drums which are empty and not polluted are collected free of charge for recycling or reconditioning purposes. When incinerated, polyethylene has no harmful effect on the environment.

Eco-Point sprayers are made of PE or PET: light weight, little raw material per bottle, low production energy consumption, virtually unbreakable and therefore long life, little waste during production and recycling, no harmful substances when incinerated, 100% recyclable.
