TECHNICAL DATA SHEET

Proleco NF. A strongly manicuring hand soap specially developed for ink polluted hands in (offset) printing offices.

Product description

Proleco NF is a unique heavy duty hand cleaner for the removal of extremely heavy ink pollution. The fact that Proleco NF both cleans powerful and has re-fattening qualities makes the product unique. Proleco NF is based on a natural solvent, which results in extra cleaning power. Proleco NF is very economical in use because of its extreme cleaning power.

Solution areas

- Extreme dirty hands often are difficult to clean
- Traditional hand cleaners, containing abrasives, cause cracked skin and little wounds
- (Offset) ink pollutions are very difficult to remove
- Contaminations can cause skin diseases
- Traditional hand cleaners based on aggressive solvents degrease the skin aggressively without re-manicuring it, which causes dry and damaged skin.
- Damaged hands negatively influence the quality of work, thus lead to extra costs and even can be a cause for absence through illness.
- Many hand crèmes that are being used afterwards badly or slowly soak into the skin, which may lead to stains on the print work.

Sustainable solution

Proleco NF will even clean the most heavily ink polluted hands. Proleco NF can be safely used on the skin and is ecologically safe. Besides printing inks, Proleco NF removes oil, grease, tar, colour agents, soot, earth, ground dirt, creosote etc.

Special advantages

- Contains a natural solvent for extra cleaning power.
- Manicures the skin rapidly without feeling fatty.
- Is economical in use because of its high cleaning power.
- Contains no abrasives that cause chapping but a scrub based on burnt rice husks.
- Prevents hands from little wounds and roughness.
- Contains nature-pure ingredients, is hygienic and skin protective.
- Proleco NF works very rapidly.

Areas of application

Proleco NF can be used to clean the most heavily contaminated hands.

Remarks

No special restrictions apply.

Product instructions

Use Proleco NF very economically. Take a small quantity in your hands. Rub in Proleco NF all over your hands thoroughly and rinse with water.

Packing material

Eco-Point International products are packed in polyethylene H.D. or metal drums. When repeat orders are being delivered, used drums which are empty and not polluted are collected free of charge for recycling or reconditioning purposes. When incinerated, polyethylene has no harmful effect on the environment.
