TECHNICAL DATA SHEET

Safeco Special. Fast action cleaner/degreaser based on safe and biodegradable solutions for the removal of all sorts of contaminants in an environment where adhesives, sealants, resins, etc. are used.

Product description

Safeco Special is a product intended for cleaning and degreasing in the chemical industry where rapid and thorough action is required. An end result without residue is also often necessary within this context. Safeco Special's safe character makes it safe for human use, resulting in an extremely safe workplace environment. Safeco Special is completely free of aromatics and halogens and leads to a fast-drying end result.

Solution areas

- latex residues
- sealant residues
- degreasing moulds
- dissolving plastics such as polystyrene
- contaminated tools
- dirty filters
- contaminated surfaces which need to be cleaned quickly
- various ink residues
- adhesive residues
- uncured PUR foam
- contaminated components
- contaminated machinery and work benches
- pigment removal

Sustainable solution

Safeco Special is the solution people want to use when they have to work quickly and above all safely. In practice, this is in places where the surface is required to be handed over clean and dry. Safeco Special works quickly and effectively.

Safeco Special is the responsible replacement for brake cleaners, trichloroethylene, ethyl acetate, acetone, cleaning spirit, thinners, etc.

Special advantages

- Safeco Special is aromatic-free
- Safeco Special works and dries quickly
- Safeco Special does not contain any chlorinated hydrocarbons such as methylene chloride, 1,1,1 trichloroethylene etc
- Safeco Special features a superb degreasing action and does not leave any residue
- Safeco Special is safe for humans, the environment and materials
- Safeco Special is safe for use with regard to all types of metals and plastics (and it is non-conductive)
- After degreasing it gives a high surface energy

Areas of application

- Removal of adhesive, sealant and latex residues
- Cleaning of various inks
- Pigment removal
- Degreasing of moulds
- Cleaning/degreasing of components, tools and machinery
- Cleaning/degreasing of ball bearings, chains and conveyor belts
- Degreasing of metals and plastics (first test for resistance)
- Removal of stickers and adhesive residues
- Cleaning of filters
- Graffiti removal
- Removal of uncured PUR foam
- On contaminated surfaces that need to be cleaned quickly leaving no residue
- Follow-up processes → Safeco Special ensures a high adhesion value after cleaning/degreasing which brings an absolute added value to subsequent processing. For example degreasing before gluing, coating, etc.

Remark

In case of doubt about rubbers or plastics, test first on a less noticeable area.

Seen its multipurpose characteristics, Safeco Special is suitable for the food processing industry.

It can play an essential role for food processing companies that have to work according to HACCP standards. Contamination is a “critical point” and must be kept under close surveillance. Safeco Special contributes to a controlled working environment.

*Is an independent German research institute that issues certificates for adequacy of cleaning products for the food industry.

Product instructions

Safeco Special must be used undiluted. Safeco Special can be applied by spraying, with a cloth or brush or by dipping.

- Spraying: unscrew the spray nozzle far enough for it to form a jet. Spray Safeco Special directly on the object to be cleaned. Allow the product to work for some time, then wipe off using a cloth, rinse with water or blow off with compressed air.
- Immersion: dip the object in Safeco Special. Allow the product to work for a while. Then let the object drip and rinse with water or blow dry.
- Blow drying or air drying means with the aid of a cloth or paper.
- Cleaning can be supported by the use of a brush or a cloth. Using a dampened cloth prevents mist formation which, besides having other benefits, is more economical.

Packing material

Eco-Point International packages its products in metal or polyethylene HD and accepts returns of empty/clean packages for recycling or reconditioning free of charge when further orders are placed. PE has no harmful effect on the environment when incinerated.

Spray bottles used by Eco-Point International are made of PE or PET: lightweight, low use of raw materials per package, low use of energy in production, virtually unbreakable, therefore has a long life cycle, low quantities of waste during production and subsequent recycling, no toxic substances upon incineration, 100% recyclable.
